

## Studio Guidelines for Summer 2020

*Revised 6/13/20*

- Drop dancers off no more than 10 minutes prior to class start time, and pick them up promptly at the end of class.
- There is currently no seating in the hallway.
- You may not wait or linger in the main hallway.
- To limit the number of people in the studio, and with limited space, we are asking that parents and siblings wait outside or in their cars at this time. (Please contact Linda if you have a concern regarding this, so that we can find a solution.) We will ALWAYS call in the event your child needs you during class due to illness, injury, etc.
- Bring your own labeled water bottle, if needed, and leave it in the hall outside the classroom door. Please note we are not permitted to sell water bottles or use the water fountain at this time, but you may also keep a drink in the car for after class to avoid bringing things in and out.
- Come dressed and ready to go only needing to change shoes.
- Do not bring in any extra belongings/avoid bringing a dance bag if not necessary.
- Dancers will enter through the double doors into studio one. Studio one will act as our current “lobby.”
- Hand sanitizer will be available for the dancers as they enter and should be used prior to taking class.
- Dancers (and teachers) will be signed in before class. Temperatures will be checked using a touch-free, infrared thermometer.
- Each studio has squares taped on the ground to demarcate your dancer’s space.
- If you choose, you may wear a mask entering and exiting class, although we ask the dancers take class without their mask to prevent overheating
- Doors in the front and rear of the studio will be open to allow fresh air through the studio. Likewise, doors will be kept open during class.
- Dancers will exit through our main door after class.
- All surfaces, floors, barres, door knobs, bathrooms, counters, etc. will be disinfected according to the current CDC guidelines for our business. We will be using simple green products for most cleaning as well as an anti-microbial applicant on some shared surfaces.
- Most importantly, we ask that you monitor your child for any symptoms of illness, such as fever. If your dancer has a fever or becomes sick, do not attend class. We will make arrangements for you to take another workshop that is similar.

Thanks for your cooperation with these measures at this time! We are just so happy to be back in the studio able to dance together while adhering to health recommendations for everyone’s wellbeing. Thank you!
